C-ROADS

URBAN C-ITS TRAINING SESSION

The Urban C-ITS Training session, organized by the C-Roads Urban Collaboration Group, brings together cities and organisations with hands-on experience deploying C-ITS services, alongside technical experts from the European C-Roads Platform. It highlights how C-ITS is being deployed to advance urban mobility priorities, and provides practical guidance for C-Roads-compatible deployment of C-ITS services. The session is open and accessible to participants without previous experience in C-ITS deployment.
